

4G UNLIMITED FIXED IP SIMs

Unleash the power of Business Grade 4G with unlimited Data Fixed IP Solutions

Comms365's Unlimited Data Fixed IP SIMs provide data only Internet connectivity using 4G mobile technology. Utilising SD-One and a Comms365 4G Router combined with unlimited data 4G SIMs on the UK network of your choice, this Fixed IP 4G solution is perfect for businesses who require large amounts of data for their primary Internet connection or failover.

THE CHALLENGE

For businesses who need reliable communications with large amounts of data, which include Quality of Service, DDoS Protection, next business day-break/fix and Failover capabilities as standard. Challenges arise for businesses when fixed line services are problematic or unavailable.

THE SOLUTION

The 4G Unlimited Fixed IP SIM solution offers unlimited data for primary Internet connectivity or as a Failover circuit. Options are available to incorporate bonded technology with additional 4G SIMs to enhance resilience and performance of the connection. With built-in Optimisation features available, Comms365 Unlimited Fixed IP SIMs are truly unique.

USE CASES

Construction Sites

Reliable communications are mission critical as any downtime reduces productivity.

Retail

Every selling second counts in a retail environment, so a reliable 4G connection is a must.

Office UC Resilience

Offices that rely on unified communications systems and cloud applications demand high availability.

WHAT IS INCLUDED IN THE BOX?

Everything you need to deploy a Fixed IP 4G Solution is included in the service.

- 1 x SD-ONE Appliance** Uses SDN Technology and has a host of additional features that can be activated.
