

# 5G UNLIMITED FIXED IP SIMS

Unleash the power of Business Grade 5G with unlimited Data Fixed IP Solutions

By enhancing the hugely successful 4G Unlimited Fixed IP SIM service, Comms365 now offers a game changing solution based on 5G. Utilising SD-One, a Comms365 5G Router and combined with huge data 5G SIMs on EE, Vodafone, Three or O2, this is the only Fixed IP 5G solution available and a true business class solution.

## THE CHALLENGE

For businesses who need reliable communications with large amounts of 5G data, which include Quality of Service, DDoS Protection, next business day-break/fix and Failover capabilities as standard. Challenges arise for businesses when fixed line services are problematic or unavailable.

## THE SOLUTION

The 5G Unlimited Fixed IP SIM solution offers unlimited data for primary Internet connectivity or as a Failover circuit. Options are available to incorporate bonded technology with additional SIMs to enhance resilience and performance of the connection. With built-in Optimisation features available, Comms365 Unlimited Fixed IP SIMs are truly unique.

## USE CASES

### Construction Sites

Reliable communications are mission critical as any downtime reduces productivity.

### Retail

Every selling second counts in a retail environment, so a reliable 5G connection is a must.

### Office UC Resilience

Offices that rely on unified communications systems and cloud applications demand high availability.

## WHAT IS INCLUDED IN THE BOX?

Everything you need to deploy a Fixed IP 5G Solution is included in the service.

- 1 x SD-ONE Appliance** Uses SDN Technology and has a host of additional features that can be activated.
- 1 x Comms365 5G Router** Enterprise grade, built to last, with 4G LTE Pro fall back for areas with little or no 5G.
- 1 x 5G SIM – EE, VF, Three or O2** Unlimited Data – Subject to FUP.
- 1 x Fixed Public IP Address** Ability to upgrade to /30 or /29 if required.
- 1 x Break / Fix Service** Next business day Break / Fix as standard.
- 1 x Set-up Guide**
- 1 x Set of Cables**

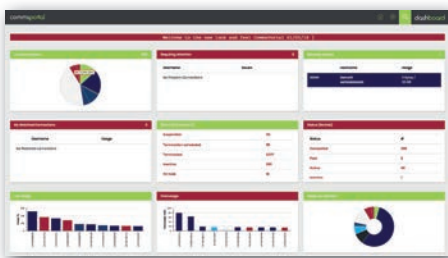

Configuration of the service is done prior to shipping.

## OPTIONS

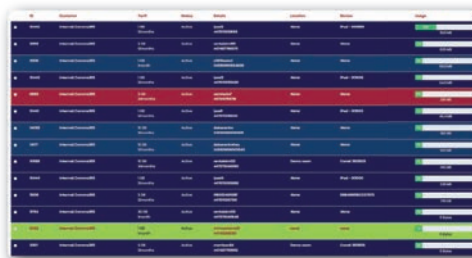

- Additional IPs (/30 or /29 or more available)
- External 5G Antenna
- Wireless Access Points
- Multi-Site SD-WAN Upgrade
- 5G Router Upgrade
- Up to two additional 5G Routers and SIMs that can be bonded together for extra resilience.

## COMMSPORTAL

Our Services Management Platform, CommsPortal allows users to view granular data usage from each and every SIM on their estate, compare usage between months, run reports and manage the lifecycle of each SIM. With a secure login you can manage your estate, place your orders or raise a support ticket all in one place.
