

## TESTIMONIAL

### THE PRODUCT

The Continuum Bonded solution combines multiple 4G services from different carriers into a single high performance internet connection, with Quality of Service, as standard.

Delivered in a portable and ruggedised unit that can be plugged in the moment it arrives on site, Continuum provides rapid, high performance internet services to users.

Continuum is available for a short term or temporary contract which is often used when a Fixed Line installation is awaited.

**UK NATIONAL SUPPLIER OF PPE, CLEANING, HYGIENE AND HEALTHCARE PRODUCTS CONTACTED COMMS365 LOOKING FOR A SOLUTION THAT WOULD PROVIDE INSTANT INTERNET ACCESS FOR A NEW WAREHOUSE IN A REMOTE LOCATION.**

Nexon Group UK needed a high performance 4G connection immediately, which they could use at their new location for just a short period of time whilst waiting for their fixed line to be installed. Providing immediate connectivity would allow them to start operating at the new warehouse straight away, to distribute highly demanded PPE equipment during the Covid-19 pandemic.

Following a telephone call to scope out the project, it was quickly established that in order to achieve the required performance and speeds they desired, a bonded Internet solution would be more suitable to handle the expected workload, compared to a single SIM connection.

With this in mind, Nexon Group selected a Continuum bonded Internet solution with a 5-Bond 4G connection to support the new distribution centre. This ensured that they were able to keep up with the high demand for their PPE and cleaning equipment and efficiently dispatch the orders to care homes and hospitals. Delays were avoided and the PPE protective equipment was delivered.

The Nexon Group Director explained,

“ Comms365 provided us with the continuum bonded device giving us a fixed routable IP address with high speed connectivity and a VPN. This meant that our new remote warehouse - which we moved into earlier than expected without any fixed broadband - could continue to provide essential PPE and other supplies to frontline healthcare during the first month of the Covid-19 pandemic. **The service was fantastic, I ordered the product late morning and by 8pm the same day the device was delivered, ready for use. Connectivity was flawless, for the whole month we didn't experience any drop in connectivity at all. I'd highly recommend this company for your mobile connection solutions.** ”
