## TESTIMONIAL

### THE PRODUCT

The Continuum Bonded solution combines multiple 4G services from different carriers into a single high performance internet connection, with Quality of Service, as standard.

Delivered in a portable and ruggedised unit that can be plugged in the moment it arrives on site, Continuum provides rapid, high performance Internet services to users.

Continuum is available for a short term or temporary contract to suit individual projects and time frames.

**ABSOLUTE LIVE PRODUCTIONS HAD TO ADJUST ITS FOCUS FROM LIVE STREAMING TO PROVIDING REMOTE SOLUTIONS, FOR PEOPLE TO USE FROM HOME, DURING THE ONGOING GLOBAL PANDEMIC.**

**They discovered that not everyone working remotely had the necessary Internet connection to support live streaming. They required a solution that provided a fast, reliable and secure connection that was accessible to everyone.**

**Comms365 provided temporary, portable and managed bonded 4G solutions, enabling instant high performance Internet connectivity.**

“Comms365 was the **perfect solution** for us. They delivered the Continuum cellular bonded system directly to the door with **no hassle**. It was easy to set up and connect to our own equipment, and the Continuum produced upload and download speeds well above the threshold of what our clients would need.

When we **needed to ask specific questions or extend the rental period** beyond what had been previously agreed, there was always a member of the team readily to talk to us. Furthermore, when our team reported Internet speeds below what was required, a member of their tech staff was able to **remotely re-optimize** the system for the location and bring the speeds back within a comfortable range. The Continuum system supplied us with **fast, reliable Internet** for all our streaming needs.

This cellular bonded solution and the team behind it are **exceptional**. Comms365 provides not only the equipment, but the **personal touch** that makes **working with them a truly excellent experience**.”

“... the team behind it are exceptional... We will definitely contact their team again should we need another reliable solution for network connectivity.”
