

What do CMC do?

CMC are one of the leading IT companies with customers in London, Milton Keynes and across the UK.

Support services are a significant part of what CMC offer and we pride ourselves on providing the very best in professional assistance to help protect and improve your IT and mobile systems.

We have an in-house helpdesk support team that focuses on combining high levels of technical ability with attentive and personalised customer care. Our monitoring service allows engineers to pro-actively supervise systems and address any potential issues before they impact on business operations. Business owners who work with CMC have the peace of mind that a team of trained professionals is handling their IT systems.

What do Comms 365 do for you?

We were introduced to Comms 365 through another supplier when the need arose to supply customers with Fixed IP mobile sims. It has enabled us to enter and support new markets and offer innovative solutions to new and existing customers.

Our customers use these sims for anything from monitoring data to leased line and telephone system back-ups.

What are they like to work with?

Every person we have spoken to at Comms 365 has been a pleasure to deal with, extremely knowledgeable and very quick to resolve any issues that may arise, from their Managing Director Mike to their helpdesk support engineers.

We cannot fault the top-quality service we have received since day one, and we look forward to continuing to work with Comms 365 in the future.
