

10th August 2015

Dear Mike,

I feel I need to write to you to thank you for the amazing service you gave again this week on getting me a 50Gb fixed IP online and ready for collection in under 2 hours for an urgent security job.

I have realized that Comms365 value the customer's relationship with their clients and that is reflected in the professionalism of their interactions. The bottom line is that you make sourcing fixed IP SIM cards and 4G equipment easier and help us get services out to our end users faster.

My overall experience in working with you all at Comms365 is very much a positive one. Your network reliability and quality of service is refreshing and that is why you have been our preferred supplier for all fixed IP SIM cards requests over the last 3 years and will continue to be so.

I would advise anyone that is considering an opportunity to work with Comms365 to do so.

Best Regards

*Richard Dix
